NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

@ 0800 on 15 APR 18 I woke up and checked weather for a flight I planned from 82J to KMOB. It was a bit windy but otherwise weather was an amazing VFR day. I continued to plan my trip and file via ForeFlight. The trip that day was personal with a friend. Upon arriving to the airport we conducted pre-flight and ensured all was in order to make it a safe flight. @1000 we took off on RWY 36 direct for KMOB. Along the way I had transponder and radio issues but managed to obtain flight following. However, we arrived at KMOB with no significant issues. On the return trip to 82J I asked Pensacola Approach for an update on winds. They informed me that winds were 300 at 18kts. Knowing that there would be a crosswind I proceeded with my approach to RWY 36 at 82J. I entered the traffic pattern downwind at a 45 and proceeded with a normal traffic pattern. On final I put in 10 degrees of flaps and maintained a faster approach than normal due the crosswinds. When I leveled out I was still fast and further down the runway than I'd like to have been so I weighed my options. I could either try to do a go-around or touchdown and brake. I did not think I could clear the 40ft trees at the end of the runway so I proceeded to land and break upon touch down. I touched down between half way and the last 1/3 of the runway. As I pressed the brakes harder my right shoe became stuck in between the right pedal and brakes. This caused the airplane to veer right and into a small creek where the airplane came to a full stop. No one was injured. When I stepped out of the aircraft I saw that the wing tips were bent but could not tell if more damage was done to the aircraft. I went by the airport the following day and saw that the propeller was bent but no other visible was apparent.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The accident could have been prevented by either initiating a go-around earlier in the descent or diverting to KPNS where there would have been a runway more appropriate for the winds that day. Additionally not pressing the breaks as hard as I did would have prevented my right foot from getting stuck.
