Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Tail cone showed indent along edge of root attachment plate. Was later to be found an indicator of far more substantial damage: bent airframe. This conclusion was drawn by mechanic and relayed to PIC (Bart Aarsse) by employer (Ilan Nahoom, Flying Helicopters Made Easy).		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. Dual flight. Taxied into the Sheltair parking area from TWY G6 with students on controls, instructor on collective with him. Student started lowering collective, controlled, to set aircraft down on designated spot, instructor followed on all controls. Student lowered aircraft to approximately 8" above ground, then lowered collective rapidly (I suspect because he was anticipating ground contact) into ground, resulting in harder than usual landing. Student immediately raised collective aggressively to re-establish hover, where instructor took over all controls. Aircraft was set down and shut off. Pre-flight for next flight revealed damage to tail-cone.		

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation Less blind trust should be had in students that may have a multitude of hours in their logbook, but are unfamiliar to new instructor. This advice was given by FAA representatives during a counseling session with PIC (Bart Aarsse). Retraining in the maneuver (landing from hover) has already been conducted for student (Isaac Darwish).															
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)															
Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i>			Total Time/Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours
