Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

NOSE GEAR STRUT SHEARED off, Firewall $\frac{1}{2}$ Belly Damaged, Prop Strike,

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I ARRIVED AT KENS (Lancaster) to fly a few hours on 4/22/18. I had a cross-country planned, but, upon arrival, was informed by Aero Tech staff that the Skycatcher had starter issues. They recommended I fly locally. After preflighting the plane, I Recalculated for a trip locally, deciding to go to THV for some touch & gos. It was a Nice VFR DAY, clear, calm, sunny.

I took off at approximately 2:20/2:25; I headed SW. I flew at 3100' with flight following (Harrisburg). Nearing THV, I made the necessary preparations to enter the landing pattern. I was aware of 1 plane (an Archer) already in the pattern on the downwind to land on Rwy 35. Radioing in, I joined the pattern on the upwind to 35, planning to extend my pattern as needed to allow the Archer time to land, ^{he was} making a full stop.

As I turned base to final, I realized I was too high so I opted to go around. I made the required radio calls and continued in the pattern. I was on course in the pattern, correct altitude 1400' and all appeared stable. I turned base to final and was descending appropriately. As I completed the round out and flare, I noted I flared too early and was high. I attempted to correct this with power and holding. I made a hard landing and bounced. As I tried to correct this, the plane quickly bounced again and the nose went down onto the runway. The hard landing followed by bounces happened too quickly; I was unable to correct it.
