

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location Nearest City/Place: <u>Vacaville / KVCB</u> State: <u>CA</u> ZIP: <u>95688</u> Country: <u>USA</u> Latitude: <u>38-22.693333N</u> Longitude: <u>121-57.671667W</u> <i>(Enter in decimal degrees or degrees:minutes:seconds)</i>	Accident/Incident Date/Time Date: <u>04/27/2018</u> Local Time: <u>Noon</u> <i>mm/dd/yyyy</i> Time Zone: <u>PST</u>
Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None	

AIRCRAFT INFORMATION

Registration Number: <u>N54V</u> Manufacturer: <u>Beechcraft</u> Model: <u>BE76</u> Serial Number: <u>ME-313</u> Year of Manufacture: <u>1980</u> Amateur-Built: ☐ Yes ☒ No <i>If Yes:</i> ☐ Kit/Plans ☐ Original Design Make: _____	☒ IFR-Equipped and Certified ☐ Commercial Space Flight ☐ Unmanned Aircraft Maximum Gross Weight: <u>3900</u> lbs Weight at Time of Accident/Incident: <u>3600</u> lbs Number of Seats: <u>4</u> Flight Crew Seats: <u>2</u> Cabin Crew Seats: _____ Passenger Seats: <u>2</u> Number of Engines: <u>2</u>

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

dual prop strike & belly damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

See attached MEI and student statements.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Remind Instructors and students more often of the Sterile Cockpit during critical phases of flight regulation in our operations manual.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

To whom it may concern:

On Friday, April 27, 2018 A BE-76 landed at Nut Tree airport (KVCB) with the landing gear still up. I, Bryse Greene, was the pilot in command of the airplane when the incident occurred. This was during a training lesson while practicing takeoff and landings as well as engine failure procedures while in the local area. The student was Craig Modlin. Craig and I are both Flight instructors and Craig is working toward his Multi engine certificate. We had started off the day by him asking about the preflight and I had gone through it with him. He seemed to not be concerned with a checklist. After I explained to him that he is a Flight instructor and that he should know that checklists are a special emphasis he had used the checklist for every phase of flight afterward. Craig had done 4 takeoff and landings to a full stop and did fairly well with the occasional reminder of the use of flaps.

While practicing takeoff and landings I had emphasized the "before landing" checklist and know what the gear warning horn sounds like. I had also trained Craig to do a "GUMPS" check 3 times. Once on downwind, another on base, and the last on final approach. Craig seemed to be very comfortable with doing the before landing checklist after the 3rd time so I decided to throw in something a little more challenging. We had practiced one engine failure prior to the incident and all was well.

Once I had simulated engine failure in the air by use of the throttle, Craig had focused on the checklist and procedures inside rather than outside. As a result, we had gotten into a tighter traffic pattern. After I noted the change, he proceeded to make the correction and focus outside more. On the base leg of the traffic pattern he started asking questions about more single engine operations. I answered all questions accurately. As the base leg came to the final turn he had distracted himself by asking another question concerning the use of flaps with a single engine approach. As this came to an end I told him to focus on aligning with the runway and land the plane at the intended touchdown point. As this was all happening we had both been distracted by flying the plane and landing that we forgot to bring down the landing gear.

As soon as the plane touched the surface I knew something wasn't right because of the characteristics of the landing and the sound. It was very apparent that we had landed without gear. Craig did a very good job securing the plane by shutting off all fuel related items and I had turned off all lights and avionics as well as the engine magnetos. We are both fine and unharmed other than being upset about the actions.

I understand that this was an incident that could have, and should have, been avoided. There was no mechanical malfunctions and the warning horn was sounding. This was a result of pilot distraction on both parties. I am thankful that nobody was harmed and also thankful that the damage was not severe. I do not know the extent of the damage as of now.

April 27 Incident

At approximately 1205 local time at KVCB, I was receiving my first multi engine lesson from Bryse Greene with Wings Flight School. We have already completed a few full stop landings in the traffic pattern. During this downwind leg for runway 20 we simulated a failure of the left engine. This was my first simulated engine failure and single engine landing. We ran the GUMPS check abeam the touchdown zone and I performed all actions correctly except for actually touching and verifying the gear. We performed GUMPS once again on base and once more on final but the gear wasn't actually checked. The base to final turn led to an overshoot of final but a controlled turn was used to get reestablished. All aspects of the landing were normal until the touch down and gear up landing. Once the plane stopped sliding, I shut down all systems and cut off the fuel before evacuating the airplane on the left side.
