Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft damage noted in repair estimate supplied by Falcon Executive Aviation and provided separately with this report.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Experienced loss of lift while departing KPGA on Runway 15. Aborted takeoff and returned aircraft to runway at which point it bounced on the runway and veered to the left, departing the runway and stopping in a shallow ditch-like depression that runs approximately parallel to the runway. Flight originated at KPVU (Provo Municipal) with takeoff at approximately 1812 Zulu (12:12 MDT). Stopped at KPGA for fuel with intention of proceeding to final destination at KAVQ (Marana Regional).

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It is unclear to me what could have been done to prevent the accident/incident. The weight and balance were within proper limits, including the amount of fuel taken on at KPGA, the winds as indicated in the current onsite ASOS automated report and as observed with the onsite wind socks just prior to takeoff continued to favor runway 15 (as was also confirmed by CTAF radio traffic), the takeoff distance required under the noted conditions (including the variable wind speeds and reported density altitude) was no more than 1500 feet (with a runway length of 5950 feet), and the aircraft's engine appeared to be operating within normal parameters (as noted both by sound and observing the engine instruments) both at pre-departure runup and upon initiating and during the takeoff roll.
