Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right landing gear, right wing struts, propeller. Right wing need to be inspected to make sure it is ok.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight with Tom Leonard was a proficiency check in the Champ. Some number of years ago he did his Tailwheel endorsement in this aircraft. This was the third flight we had. First one was back in December. The second one was about a month ago. Tom did preflight, we started went to run up area for Runway 15, everything checked out ok. Had to wait for a Bonanza coming in on Runway 33. Our takeoff and climb out was uneventful. Downwind we checked the wind sock to see if 15 was still the runway of choice. Midfield looked questionable. The one at the approach end of 15 favored 15. I believe we had a bit of a bounce on landing (3Point). Slowed to almost stop set carb heat and trim. Added power and took off. Aircraft started climbing got maybe 5 – 10 feet in air and right wing went down. I would guess that it was closer to the five feet. Tom added left stick. Wing continued to go down. I have no recollection of what Tom did with rudder or what I did with rudder. We hit the ground.
