Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Sustantial damage to airframe. Salvage potential pending assesment.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

The flight was launched about 12:30 on Saturday, May 5, 2018 from Runway 29 at KVSF.

The release from the towplane was at 2300 AGL and was followed by an uneventfull flight of about 90 minutes in winds of 10 G 18 from 270 degrees, according to the airport ASOS which was also reporting scattered clouds at 8000 ft. The entire flight took place in an upwind quadrant of the airport within a maximum range of about 10 miles from the airport.

Several robust thermals were utilized which influenced decisions at the end of the flight. Namely, an elevated confidence level of potential lift which allowed much of the flight to be over 4000 ft AGL.

The last minutes of the flight were spent attempting to connect with a cumulus (marker cloud)which appeared to be about 6 miles upwind from the airport. The associated downflow from the thermal activity, apparently related to this cloud, resulted in several hundred feet of altitude loss. This attempt for lift was abandoned and an immediate return to the airport was initiated. The same sinking air had to be re-traced without any useful lift available.

A landable field was selected, but the aircraft had insufficient altitude to clear a tree-row on the west side of the field.

The contact with the tree branches caused a slowing of the craft as well as a right yaw result that initiated a half-turn spin entry.

Pilot did not exercise the primary prerequisite of soaring rules, namely to maintain sufficient altitude to reach a useable landing site.
