NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible. Shawn and I spent an hour doing an extensive brief on what to expect from the Stearman of which he had a 2 page outline. I had already done a walk around checking everything. After start the engine and checking ATIS I received clearance to taxi to 28R. after reaching the run-up area and doing the run-up I received clearance for takeoff staying in th pattern for full stop landing or the option. During takeoff, climb, crosswind, downwind, right base to final everything was normal. After doing a wheel landing on roll out the wind from the SW caused the aircraft to start to turn left which I countered with right rudder causing the aircraft to turn right do to over controlling I caused a ground loop which could not be corrected by me or my check pilot, Shawn. A contributing factor was the fuel in the high wing changing the CG during the rudder input causing weight change on the main gear.
