Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to One propellor blade, spinner, all three wheel pants, leading edge of wings, Wingtips, Flaps, Left Landing Gear, Left Tire Hub. Multiple Gouges in Runway. Fence damaged as well as grass on side of runway.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KFWN on Instrument Flight plan at 1215 Local. Enroute, ATC vectored me below the Clouds around the KORH airport at which point I canceled the IFR flight plan, and proceeded Visually to 9B1 as there is no instrument approach to the airport. Joined the downwind for 32 in a normal manner and flew a standard left pattern to 32.

Performed a visual short field approach to Runway 32 at 9B1. I had operated this aircraft in and out of the field previously without difficulty. The windsock on the field was blown out, but I had a quartering headwind from the left according to G1000 display as I descended through the tree line in a steep Short Field approach, with the left wing low for the crosswind.

Touched down on target speed of 68 kts in first 1/3 of runway. Aircraft did not seem to slow normally on braking. Pumped brakes and deceleration rate was less than expected., thought about going around but looked at airspeed and saw none displayed, so decided on MAX effort to stop, rather than risk a very low energy and altitude go around over the busy road at the end of the runway. Aircraft veered to the right and off the runway under max braking and ended up in the boundary fence after departing right side of Runway at very end.

After landing touchdown, skid marks showed solid braking from right tire, less than solid braking from left, and parts of the left landing gear assembly were found on the runway. Also, wheel hub and possibly other parts of the left landing gear contacted the runway as aircraft veered off centerline towards right edge of runway. However, No tires were deflated.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not only is this a challenging airport from a performance point of view, but there are no services at the airport anymore, so during the first application of the brakes I may not have been as aggressive as possible, as I was conscious of not wanting to pop a tire and be stuck. But the second pump of the brakes was very firm, and had a similar result. When that didn't work out I had already used several hundred of the 1200 feet or so and with the no airspeed showing, didn't feel that the remaining runway was safe for a go around, so at that point I applied the maximum force I was capable of to the brake pedals. There was not enough time for multiple attempts to stop before going around. My only safe chance to go around was after the first pump of the brakes.

I am not sure why the aircraft didn't decelerate as I anticipated. I don't know if it was just old cracked and tarred runway surfaces not being as grippy and more "bouncy" than a new surfaces or something failed in the plane or the wind was not as it appeared or I did something wrong.

For my own useage, after my airplane is repaired, I will never be back to the airport with that plane, as I'm raising my personal minimums for stopping distance from 1000 feet of pavement in front of me from touchdown (zero wind) to 1500 pavement minimum (plus sufficient clear way for a go around) or its below my flight planning standards and a mandatory go around as well.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No*(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)*

I don't know.
