NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The pilot was a student with 35 flight hours who just completed his solo cross-country and was returning to Defuniak Springs Airport (54J). He did a touch-n-go for practice and flew the pattern for his final (full stop) landing. On the landing he stated the aircraft landing on its right main gear and felt the aircraft was going to go off the right hand side (north side) of runway so he applied power to go around at which point the aircraft veered to the left, ran off the runway. Due to a large drainage ditch on the left hand side of runway, the main landing gear hit the far side of the ditch bank, flipping the aircraft over on to its back. The pilot then turned off the avionics and the Master, the exited the aircraft.

There was no wreckage distribution. The terrain is very flat except for the man-made ditch. If the ditch were not there, the aircraft would have stayed upright and likely have come to a stop without any damage.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The student had numerous landings at this airport (over a hundred) and there were no indications he had any deficiencies. He had completed his dual cross country earlier in the day and no issues were noted by his instructor. If it were not the ditch to the side of the runway, the only issue would have been him leaving the runway and no damage would have occurred to the aircraft.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

Only 1 occupant. The pilot turned off all avionics and the Master and then unbuckled his 4-pt harness. He was upside down so he then crawled out the pilot's door.
