Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wire-strike damaged vertical stabilizer, and top of rudder.

Property damage was downed power line.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off at proximately 09:00 from our home airport (Bob's Flying Service, [REDACTED] Knights Landing, Ca) with enough material to spray two fields totaling 80 acres. After finishing the first field I went to the second field and surveyed the area to make sure it was clear, then made a perpendicular pass over a high tension line that cut across the northwest corner of the field to make sure there were no obstructions under the wire. I then went out bound to the east, made a 260 degree turn to the west to so I could go under the wire from east to west. On the bottom set of wires there was one wire that was sagging lower than the other, so I was having to get very low, and just before I got to the wire I hit some turbulence (as mentioned, the wind was dead calm, so my thinking is that I might have hit my own wake turbulence from making the pass over the wire) ... the result was that I had to push the nose down to keep from being bounced up into the wire, and when I did the result was that the tail went up into to wire and damaged the top 12" of the vertical stabilizer and bent the rudder.

After impact the aircraft did yaw to the right, but I was able to correct by adding opposite rudder, some crabbing, and reducing the airspeed to Vfe. Flight home and landing were uneventful.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Personal minimum clearance distance to go under wires has increased.
