NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

06/06/2018 mishap during takeoff occurred. During the soft-field takeoff procedure, the aircraft went into ground effect and something happened to cause the left wing and/or left main landing gear to drop and make contact with surrounding vegetation. The aircraft settled back to the ground on a heading about 30 degrees left of runway heading. The aircraft spun around causing the gear to collapse where the aircraft then came to rest. All occupants egressed without further issue or injury. The weight and balance calculations were within the operational limitations of the Pilot's Operating handbook. Additionally, there was no indication that the aircraft engine or other systems malfunctioned during the event.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Soft field procedure should emphasis reducing weight on nose wheel, but insure the aircraft does not become airborne below normal takeoff speed.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
