Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left Landing Gear Collapse; Left Propeller Strike; Left Wing Damage - Upper and Lower Surfaces.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I, James Modeste, Cert. #: [REDACTED] on or about 2040 local time 22JUN2018, in a 1963 Piper Twin Comanche N7072Y, conducted flight instruction with a Korean pilot named Yonghyeok Jang performing the duties of pilot in command. A VFR cross-country flight was filed from KGYR KHII KVCV KGYR and the student requested to complete several takeoffs and landings to a full stop on RWY 21 KGYR prior to activating the flight plan. GYR control tower was still open and I recalled completing 2 stop and goes and at least 1 go-around due to poor wind correction turning based to final before ATC closed which prompted a quick statement by me about bank angle, cross-control, and stall/spin awareness.

It is also my recollection that the tower closed at 2100 while in closed traffic pattern with ATIS information X. Although this traffic pattern was wide, the base to final turn was better anticipated by the pilot. Wind correction in the landing technique was still a bit weak and we drifted slightly left of centerline at touchdown. The pilot applied right rudder overcorrecting the amount needed at that speed on landing rollout, and when a ground loop commenced he locked the brakes and we continued veering right near midfield RWY 21. I did not request flight control, but I did ask that he release the brakes to no avail. As the airplane exited the RWY near perpendicular to the edge, my only control was the remaining right rudder and nosewheel steering which I used and fishtailed the airplane further right just before the left gear collapsed and the airplane came to rest a couple feet short of the 5000ft marker.
