Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

damage to wheel, spinner, prop and left wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Aircraft overshot the runway and ran into the grass and brush at end of the runway resulting in damage to wheel, spinner, prop and left wing. Factors contributing to the accident including high terrain around the airport which caused the airplane TAWS system to provide loud annunciations "Terrain, pull up, pull up" which startled me leading to delay descent and overshoot the ideal touchdown zone.

Factors contributing to the accident are:

1. ATC cleared me for a direct route to S10, when I had filed for V2 ELN EAT S10. As a result, I arrived over Lake Chelan at 9,500 (VFR on Top) which required a difficult descent in a tight canyon to pattern altitude
2. Runway surrounded by rising terrain such that pattern altitude places landing aircraft very close to terrain while in the pattern.
2. The Terrain warning system provides loud, distracting annunciations during a critical phase of flight even when at normal pattern altitude.
3. The pilot failed to properly manage the airspeed during descent to allow a safe landing or go around and will immediately institute additional training to overcome this deficit.
