Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The front tire of the aircraft was blown out and some small pieces of the wheel rim were chipped off. The propeller was bent at the ends from hitting the ground and the exterior fuselage behind the firewall was wrinkled.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Santa Barbara airport (KSBA) at approximately 10:50 pacific time on Sunday July 8th with two passengers aboard a Cessna 182Q airplane. The Airplane had been fueled up to full before we arrived at the airport. I performed my preflight inspection, obtained weather information and clearance, and departed to San Luis Obispo Airport (KSBP). The flight went smoothly and we were cleared for straight in approach for runway 29. Upon descent there was minor turbulence. On final, The Vasi showed an appropriate glide slope and my airspeed was around 75-80 mph. Flaps were full down and, just as I began my flare, I felt a slight sink in lift that resulted in a hard landing. After the initial contact with the ground, the airplane bounced four times with escalating severity and height of each bounce. After the fourth bounce, I made sure my passengers were safe and followed Tower's orders to exit the runway. The plane was taxing rough and I was sure the tire had been damaged. When I came to a complete stop off 29 at taxiway Foxtrot, I contacted ground and informed them of the problem with the tire. They instructed me to shut down the airplane and sent an airplane tug to get the plane to a better location out of the way. Upon inspection, I could see the front tire was blown with a few pieces of the rim missing, the propeller was bent at the tips from hitting the ground, and the fuselage aft of the fire wall was wrinkled.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The 182 is an airplane that I greatly enjoy flying but I hadn't flown it recently before the accident and underestimated its weight; trimming significantly more would have certainly helped with my flare and could have prevented the flat landing and resulting bounces. I should performed a go-around after the first hard impact with the ground.
