Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The landing gear being ripped off of the airplane due to contact with the deer resulted in irreparable damage to the wing spar.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was landing at 1B1 after an uneventful cross-country trip from CGS. The flight was completed under IFR up and until I cancelled IFR when I had the field in sight.

The time was approximately 9:40 PM and the sky was pitch black because the moon had not yet risen. I overflew the field from the west at 1500 AGL and entered the downwind of the traffic pattern for runway 21. I viewed the runway while crossing midfield and did not observe anything out of the ordinary.

The approach to land was nominal. In the flare to land, at approximately 5' AGL, I saw what appeared to be a deer run in front of the aircraft from right to left. The deer was only observable in the area lit by my landing light. The time between when I saw the deer and when the plane made contact with the deer was, in my estimation, less than a second.

The contact with the deer caused the left main landing gear to shear off in its entirety. I proceeded to land the airplane on the right main landing gear and nose landing gear alone. Directional control could be maintained until the left wing could no longer be kept off the runway surface, at which time the plane veered to the left and exited the runway into a ditch, at approximately 20kts.

I shut the aircraft down, confirmed my passenger was okay, and exited the plane. As soon as possible, I alerted local approach control of FOD on the runway. A pilot on the field called airport management, who cleared the runway of the animal carcass and the landing gear.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

An airport of this size and in a location known to have as large of a deer population as it does should be, in my opinion, completely fenced in.
