Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Main rotor, tail rotor, tail boom, cabin glass, and skids had major damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I started operations at 8 am and had put out three loads or 150 acres. At 9 am I loaded my fourth load and due to crew miscommunication took off with the load hose hooked up. This pulled me to the right towards some trees. I don't know if the load hose contacted the tailrotor or if it got into the trees but I lost tailrotor control. I was spinning and above the tree so I lowered collective to get closer to the ground before I closed the throttle but contacted the ground before I could arrest the spin.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I would implement a written briefing form as follows:

LOADER/TRUCK DRIVER DUTIES**PRIMARY DUTIES**

1. Load the helicopter and fuel as needed when landed on truck
2. Disconnect load hose, fuel hose and close fuel cap
3. After making sure the helicopter is clear make eye contact with the pilot and give him a thumbs up sign
4. If for any reason you must get off the truck while the hose is hooked make eye contact with the pilot and tell him to hold and indicate the hose
5. Speed is not important but following procedures and safety is

SECONDARY DUTIES

1. Mixing chemicals
2. Driving the truck
3. Finding the next tract
4. All these duties are secondary and should at no time interfere with the primary duties
