NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 1300 EDT over the Trailer Park, en route to North Perry from Immokalee, ATIS code "O" reported winds to be 130° at 8kts with thunderstorms and lightning in the vicinity.

I was cleared straight in for runway 10R and advised by the controller of the winds, thunderstorms and lightning. The controller advised me of the position of the weather systems a second time, which I reported I had them in sight.

Approximately 2miles west on final for 10R, the controller called again to advise that the wind had shifted and was now gusting at speeds I cannot recall.

There were thunderstorms and lightning cells to my left and right and I feared that a go-around would put me in the heart of the latter. I concluded that the best option under the circumstances was to continue a straight in approach and land on 10R.

I was already fully configured to land and continued my descent. On noticing that I was a little high, but at my normal approach speed of 60kts, I reduced the power and pitched to reach the desired glide path to the runway. On short final, I felt comfortable with making the runway.

Over threshold I began my round out and flare as usual, then the aircraft seemed to increase speed and the flare was more abrupt than I was accustomed to. The wheels touched and the aircraft bounced. Thinking quickly, I added a bit of power to arrest the descent as the plane immediately sank back to the runway.

The airplane touched a second and third time, slamming into the runway on each touch, while I tried to correct with pitch and power adjustments. The compass broke off and my door flew open and the aircraft finally came to a stop, nose down on the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

A balked landing should have been initiated.
