NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was scheduled for a solo flight in N78806 from 10:00 A.M. - 1:00 P.M. Central time through Nashville Flight Training. I have been working on adding my Single-Engine Land rating to my certificate. I had flown 3 times previously with my instructor in the past 2 weeks. I took off from runway 31 at KBNA at approximately 10:40 A.M. and headed towards KXUX. There were scattered clouds around 3,500' MSL so I stayed at about 2,700'. I maneuvered around KXUX for about 15 minutes just to make sure I was oriented correctly and observe the airport for traffic. I entered the pattern for runway 35 and did 3 successful landings. The last one was a power-off 180 which was not a very pretty landing. It was a little bit hard. So I taxied off the runway and shut down just to look the airplane over. Everything looked fine so I restarted the engine and took off from 35 and headed back to KBNA. I was cleared to land on runway 2C by tower. I was coming in a little fast because I knew I had an 8,000' runway and I wanted to get off it closer to the end of it. So I was expecting and wanted to float some. I pulled the power to idle as I leveled off and then started to flare. I must have been higher than I thought I was (possibly from going from Gallatin's smaller runway to KBNA) and I sunk down on the main wheels and the aircraft bounced. I panicked some and pulled back on the yoke thinking it would slow me down. I ended up bouncing several times before pushing the yoke down to get some forward momentum to flare again. I was able to get the plane under control and get off the runway at taxiway N. I then contacted ground and taxied back to hangar 7. That was when I noticed the damage to the nosewheel. I also wrote up the hard landing to have it looked at.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Approach at the recommended approach speed and recognize the difference in the look of landing on larger runways from landing on narrower runways.
