NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I, Robert A Thomas, private pilot certificate number [REDACTED] left the Morehead Airport (KSYM) on July 5 2018 at approximately 1:15 pm eastern time. I was heading to the Melfa Virginia airport (KMFV) about 428 miles away. I filled my tanks to capacity to about 40 gallons of fuel. I had another passenger in the co-pilot chair, Sandy Johnson, my new wife. About 3 hours into the flight we realized our fuel was very low. I usually get 4 hours of flight from a full load of fuel. I must have burned off a lot more fuel during taxi and take off. This is very unusual. I started to look for nearby airports to land at for fuel. I looked for KXSA that was 10 miles away but could not spot it from my flight path so I looked for KW75 which was directly in front of me 23 miles away. My plane RPMs dropped. I realized we were going to run out of fuel before we reached the airport. I decided to perform an emergency landing in a nearby field, then call for fuel. I picked a field on Carltons Corner Road in King & Queen Virginia GPS coordinates 37.7199564, -76.8407289. That is 369 miles from KSYM. On final as I was flying over some power lines to land in the field beyond, I lost all engine power. Since my wife and I were in front and weighed more than the luggage in back our center of gravity was in front and the plane pitched nose down about 20 - 30 feet from the ground. I tried to pull up as much as possible to clear the power lines. Once I cleared the power lines, we were headed for a tree to the left of my desired touchdown spot. I pulled the aircraft up and to the right to avoid the tree. We had no lift and nosed down front wheel first into the dirt. Upon contact the front wheel broke off and the plane teetered hitting both wingtips on the ground. I received a very small scratch on my right little finger. My wife busted her lip and sustained a small cut on her right index finger 2nd knuckle, and a couple abrasions across the top of her right hand. She also sustained an abrasion on her left calf. We both got out of the aircraft and called for help.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

IF I HAD STOPPED EARLIER FOR FUEL, THIS WOULD NOT HAVE HAPPENED.
