Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engine, Prop, Left Wing, Minor damage right wing, Tail wheel

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Coming in to land to get another load. Had full Flaps flared to land, brought throttle back to idle and landed 3 point. Just then the aircraft turned violently to the right and got very light on the gear. Then applied left brake, left rudder and push throttle forward to add power to get air moving across rudder. Was 45 degrees across runway about to run off the right side when engine started to develop power. with engine torque the aircraft rolled left and left wing struck the ground and aircraft started to go to left. I pulled power off and into reverse the aircraft settled back on landing gear going 45 degrees to the left of the runway. Then applied full brakes and reverse, aircraft went off runway into a canal and stopped.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

On a hot day when a chance of dust devils forming, I will land at a higher speed with the engine developing little thrust to keep air over rudder.
