Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft flipped over and there was a prop strike, the vertical stabilizer was damaged and the fuselage was wrinkled.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying the C140 N1902V in VFR conditions with minimal wind conditions having departed KSTS at approximately 11 am. When the STS tower would not allow close traffic work of landings and touch and goes I left the area and did some local flying including sightseeing over my property west of Healdsburg. I then went to Healdsburg Municipal Airport to do some take offs and landings including touch and goes. I believe I was on the 3rd landing, after at least one previous touch and go, when after touchdown and reduction of speed sufficient to have the tail stop flying/tailwheel on the ground the plane flipped over on its nose and stopped inverted. My passenger and I released ourselves from our seatbelts and exited the plane. I shut off the fuel and master switch.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am not certain whether I accidentally stepped on the brakes or the brakes seized. I am aware to not use brakes on a light tail dragger airplane until you are virtually stopped.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I do not know about the brakes.
