NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 7/26, I took off approximately 1730 hours on runway 35L with information India.
Winds 110 at 6kts.
Sky Clear.
Altimeter 29.95.
Warning of bird and deer activity.

Flew right closed pattern.

On the downwind, I was instructed to switch to runway 35R with aircraft landing on parallel runway.

Normal approach.

Flared high and landed hard, main gear followed by nose gear.
Plane dipped forward, felt strong vibration and nose wheel began to wobble and plane was vibrating.
Due to difficult steering and vibration, turned off the engine and steered to the grass to get out of the way of the runway to avoid obstructing incoming aircraft.

Called Tower and reported my location in the grass alongside runway 35R.

I reported to United Flight.

I spoke with Tower via phone from United Flight.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I could have asked to remain on runway 35L. This is the larger runway on which I had the most practice. Runway 35L also has 4-light PAPI glideslope indicator; runway 35R has no glideslope indicator.

I should not have steered the aircraft off of the runway. Aircraft may have sustained less damage and signage would not have been damaged had I stayed on the runway.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
