Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft totalled. Bent wing, propeller, fuselage. Wings partly separated from aircraft. Cabin partly separated from engine.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Took off from South Bend (KSBN) to Dowagiac (C91). Landing on runway 22 (turf) at Dowagiac was uneventful. Back taxied on runway 22. During takeoff, tried to stay in ground effect. After beginning to leave ground effect, the plane veered left, and the left wing dipped. Based on the position of the plane after the crash, the left wing likely hit the ground to rotate the airplane so the crash was opposite the intended takeoff direction. Crashed nose down.

I do not have a firm departure time. We intended to return to South Bend (KSBN). I do not have a firm departure time as this was just a pleasure trip, but ~1800 EDT. After the crash, the passenger seat was on its back just outside the door with the passenger in it. Passenger was concussed.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Most likely, the pilot should have applied more right rudder during takeoff and stayed longer in ground effect.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
