Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

LEFT MAIN GEAR BROKE OFF, WHICH CAUSED THE WING SPAR TO CRACK AND ALSO CAUSED SOME DAMAGE ON THE LEFT SKIN. LEFT FLAP AND LEFT ELEVATOR SKIN ALSO GOT DAMAGED.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My name is Diameon Birbal, Student pilot certificate N. PENDING, currently enrolled on the Private Pilot Course.

Today, I was doing my third solo flight, first three landings were ok with no problems, during my fourth landing, approaching runway 29, when I was about to start the flare, a white bird was approaching head on to my aircraft.

To avoid the bird, I used left rudder causing the aircraft to lose centerline and leaving half of the aircraft over the grass. As soon as I noticed this, I was going to start the procedure for a go around, but I did not have enough time. Unfortunately, as I started pitching up by pulling the yoke back my left main landing gear got caught on the taxiway sign. As that happened, the aircraft got angled to the left and with no power it settled back on the ground. I still had enough momentum to cross the first patch of grass, Alpha Taxiway and ended up on the next patch of grass just south of Taxiway A.

As soon as the aircraft stopped moving I performed a securing checklist shutting off the engine, magnetos and electrical equipment. I was able to get out of the aircraft with no injuries just an experience to learn from.

NOTE: FLIGHT WAS CONDUCTED UNDER PART 61.
