Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Pilot side wing and landing gear destroyed, engine and propellor destroyed, fuselage substantial damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departing Runway 21, Airplane was accelerating normally, tail was raised to normal position, momentarily afterwards the copilot side wing began to lift, I attempted to level wings, not enough control authority to overcome lifting wing to level and not enough airspeed to take-off from the ground, wind continued to lift wing and copilot side main landing gear, which placed side loading on pilot side main landing gear, then gear collapsed folding under aircraft, pilot wing then contacted ground, airplane rotate around pilot wing, airplane came to a stop after rotating 180 degrees. It all happened very fast. The ATIS weather observations didn't indicate wind gusts, but it felt like a gust of wind because the upwind wing came up quickly and unexpectedly.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Perhaps more airspeed prior to raising tail would have provided sufficient control authority.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
