Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike with engine damage. Right wing tip and right wing spar damaged. Fuselage slightly twisted. No property damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Fort Smith Regional Airport flying a student pilot solo training flight at 10:30 am CDT on 8/4/2018 for a pre-planned flight from the training syllabus. During routine student pilot solo pattern and landing practice on runway 17 at Sallisaw Municipal, I encountered an unexpected gust of wind from the east which caused the aircraft to weather vane to the left. I temporarily lost directional control and the aircraft departed the prepared runway surface to the east side of the runway. Though maximum braking was applied, the aircraft did not come to a complete stop before falling into a drainage ditch running perpendicular to the runway approximately 100 feet east of the runway edge and which intersects the runway approximately 2000 feet from the runway 17 threshold. Forward speed into the ditch was approximately 15 mph. The ditch was approximately 6 feet deep and 20 feet wide. The prop impacted the ground inside the ditch and the right wing impacted the ground on the other bank of the ditch. The aircraft remained intact with substantial damage to the engine and right wing. The accident occurred at 11:00am. There were no injuries and no damage to any property other than the aircraft. The airport manager at Sallisaw Municipal, the aircraft owner, and the aircraft mechanic were notified and assisted with the recovery of the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)
