NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Returning home to WS43. I left KGRB at 1734 on VFR Flight following to WS43. They released me with airport in sight. I performed normal left pattern approach for 26. Normal base and final. Some turbulence coming over trees at East end of airport. Runways 26-08. Remembering KGRB (9.6smN) was reporting winds 22 at 11. I dropped below trees and straighten out to runway approach speeds were near 60 kt. As I touched down and felt the runway, I was hearing the stall horn as in a normal landing, suddenly the plane was pitched and lifted to the right. I had two choices on that 50' runway, continue right into trees, or add power and do a go around. I added power, started to climb, started to bring it back to level. The plane was climbing and suddenly turned way more to the left. I tried to bring it back to center and it did not respond. I saw the treetops coming to the left and I was trying to just touch the tops and get up and through. The trees stopped my forward flight and spun the plane around. The plane then dropped from the treetops, straight down. I turned off the key, removed it and turn off fuel. I exited the aircraft through the right door.
