Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Collapsed landing gear and struts, wing damage, prop strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departure occurred from remote airstrip in the Alaska Range. Conditions were gusty winds with intermittent rain. Wind was oriented such to provided a quartering headwind for takeoff. A few seconds after takeoff a gust put the plane back in ground effect. The plane began to climb again, but within a few more seconds another gust forced the plane into the ground with the nose quartering into the wind. The right gear collapsed, the right wing hit the ground, then the plane skidded to a stop on the left gear and nose. It came to rest ~200 yards from the departure end of the airstrip. The wind increased substantially after the incident and later flipped the plane onto its back. Photos of the damage are attached.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Waiting for calmer conditions would have prevented the incident.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Passenger was in the rear seat (tandem seating). Departure was from a remote airstrip in the Alaska Range near Delta Junction, AK. Weather briefing was obtained from another experienced pilot via satellite messenger. Weather information listed was estimated at the remote airstrip by sight and hand held wind meter.
