Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Both wings

Broken right landing gear

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The weather was perfect. Clear, calm, smooth air approximately 70 degrees. I went to a private grass strip to practice. Strip is approximately 4,000 ft. long. Upon landing in 2 point configuration I failed to properly set the aircraft down and experienced a slight bounce. Upon resetting the aircraft in 2 point configuration it was tracking slightly to the left. The strip is rather narrow and the corn had grown to full height. I allowed the slight drift to continue without correction soon enough. As soon as the left wing tip contacted the corn the pulling force became so great as to prevent a turn out away from the field. The corn continued to "suck" the aircraft in until it spun the aircraft about 110 degrees. At this moment the right landing gear snapped and the aircraft came to rest with the right wing on the ground.
