Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller bent, nose tire flat, engine mount bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Bret Anderson was the student pilot, lining up on final approach for his first solo landing, on his first solo flight. At approximately 200 to 300 feet, while Bret was on final, a REACH company medical helicopter did a practice autorotation in front of him to the approach of runway 34. He started his go around by what sounded like adding full power and pitching up slightly. I saw the flaps come up to about half and then slowly come up to zero. He climbed out staying over the runway. He appeared to have a normal upwind, crosswind, downwind, base, and turn to final at a normal airspeed. The helicopter was clear of the runway by this time. At the point where he should have leveled off and begin to flare, he let struck the runway without any flare. The Cessna 152 bounced approximately three times and came to a stop. I'm not sure because it was about a year and a half ago, but I think the engine was still running at that time the aircraft came to a stop on runway 34.

As the flight instructor, I was observing the flight west of the runway, approximately 50 yards away, at the self serve fuel island. I ran to the aircraft and, I think, told him to shut the engine off. With the help of two other people that were near by, we pushed to aircraft onto taxiway Kilo and clear of the runway.

I asked Bret why he did what he did, and he responded that he was so shaken up by the helicopter landing in front of him on short final, that he went into panic mode and he began to shake so badly that he could no longer control the aircraft. He appeared to be in a state of shock and tearful. He said he was not physically injured and did not want to go to the hospital.

I'm sorry I can't give you any more detail than that,

Phil Cypret
