NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

The morning of 8/22/2018 I left Hinton WV at 0600 for the 3 hour drive to Philippi WV to pick up helicopter N89ZC. I arrived at RotorBlade's Maintenance Facility at the Philippi Airport (79D). I preflighted the helicopter making sure the aircraft was ready for the job ahead of powerline patrols. There is no Jet A fuel at Philippi airport so I had to get fuel before heading north to St. Mary's PA. I left Philippi around 0930 for Buckhannon Airport (W22) to top off with Jet A Fuel. I left Buckhannon Airport approx. 0950. ETE was 100 mins. Landed St. Mary's PA (KOYM) approx 1140. Landed at fuel self serve to top off with fuel. While fueling the power company employee Dave Berkebile the observer for First Energy showed up. We talked for a few minutes until I was done fueling the helicopter. After fueling we talked about what we were going to be flying for the day. I asked him his experience and if he had the toughbook (laptop) of the lines we were going to be flying. He said he had flown patrols before but not the lines we were about to inspect. He had paper copies of the lines with grid coordinates of the sub-stations written on them. After I had put the coordinates into my Ipad I conducted a tailboard about the job at hand, crossings, emergency procedures, the use of seat belts, and fuel shutoff. We got into the aircraft and departed the airport around 1215 for the Papercity PA sub-station. Upon arriving 13 miles NW of airport at sub-station I conducted a high orbit around sub-station so he could find what line we were to inspect. While in the orbit Dave asked me which way it was to Ridgway and I told him to the South, then he found the line and I dropped altitude to start the inspection. I was in standard power line patrol configuration on the left side of the right of way, about 30-40 feet above powerline flying 30-35 kts IAS. Upon reaching area incedient occured coming down mountain we both saw the 230KV line crossing so I pulled up and over the crossing , then started descending to get back on the line inspection looking out and down the mountain while descending. Dave said "Wire!, Wire!, Wire!" which I saw a split second later. I pulled hard AFT cyclic with right pedal input. Felt main rotor strike power line. Leveled aircraft into a hover to gather my wits that we were still flying. The helicopter picked up a large vibration in the rotor system. I looked and found a suitable landing area to land in which I did. I performed shutdown of the helicopter and exited the aircraft.
