Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing tip bent, several wing ribs bent and front spar damage. Repairable damage to prop. Unknown if engine has any damage at this point.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After a flight seeing trip on the west side of Cook Inlet I needed to relieve myself before flying back to Soldotna. I found an improved airstrip near a small cabin. I briefly looked it over from above and although it looked somewhat narrow it appeared to be in good condition and long enough. I had a good stable approach and right as I was touching down I had a gust of wind push me to the left a few feet. My left wing caught some brush. I was briefly able to regain control and get it headed back on the airstrip before I again contacted brush with the left wing. The second time it pulled me further to the left and I was unable to regain control. The airplane went completely off the left side of the strip and down a 2' embankment and tipped up on its nose. The prop contacted brush and grass. I was uninjured and I had no passengers. I was able to shut down the fuel and electrical systems and exit the airplane without incident.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I could have and should have made a low pass before I committed to landing here. The airstrip itself was no different than many I have landed at, but I might have been able to better assess how narrow the airstrip was, or better gauge the shifting/gusting wind.
