NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Left RUS airport for a flight after annual inspection
 Departed RUS about 2:00 PM. Left RUS Airspace and headed west. Flew to OWP
 and did 2 full stop landings. Departed OWP & picked up ATIS for RUS. Radioed TUL
 approach to get Clearance into RUS. TUL turned us over to RUS Tower and
 they gave us clearance to land on 19R. Upon touch down the crosswind
 lifted my L wing and skid us to the edge of the runway. When the
 Right tire hit the grass our Right wing hit the grass and the plane flipped
 over on its back mostly in the grass. The Left wing was about 3' onto the
 Runway. ~~After~~ we unbelted and I got the Left door open and we both
 crawled out that door. We got away from the plane and made sure it
 was safe, and then got back in and shut the fuel and master switch
 off. We called for help from a local shop and the tower call for emergency
 crews. Fire & police came. Ambulance was called off before they got
 to the scene. We talked to the emergency crews and Airport Authority
 and they give us permission to move it. The local shop had a forklift
 that we lifted it onto a heli-pad dolly and pulled it back to the local
 shop. We uprighted it and put it in the hangar until the FAA could
 look at it.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Quicker crosswind correction after crosswind lifted left wing
upon landing
