Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Blown nose tire, three bladed prop tips bent, cowling moved, wrinkled skin on left & right sides of A/C behind firewall.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 11 Sep 18, I called Lockheed Leidos and got a weather briefing and filed two flight plans. I flew VFR down to Page. We left KOGD at 6:45 L & landed KPGA at 8:15 AM L. We drove to Wahweap Marina, returned to KPGA at 4:15 PM L, turned in the rental car, paid the FBO for 48.6 G of Fuel, did a pre flight, started the engine, listened to the KPGA weather, announced & taxied. I performed pre-flight run up check & everything was normal. I departed RWY 33 turned NW and began my climb. About 8,500, I contacted Denver center to open my flight plan & while talking with them, noticed my Cylinder Head Temp was almost in the red, the engine was running rough and I was losing RMP and Manifold Pressure. I decided to turn around, told Denver what was happening & headed back to KPGA. At 8,000 I set up for a right down wind to Rwy 33, told Denver I would announce on KPGA CTAF and I intended to land. I did that, pulled back on the power, increased mixture & the prop, announced my intentions, entered a R downwind to 33, turned base and final. I was at 80 knots with full flaps as I crossed the threshold. I reduced power and started my flare. The A/C dropped to the runway. I bounced 2 or 3 times, blew the tire and I taxied off the active & shut down. Maintenance came out and towed me back to the ramp.
