Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Both wings damaged from hitting fence post. Canopy and canopy frame broken. Bottom of fuselage aft of landing gear door damaged. Fuselage near tail wheel damaged. Right flap damaged. The barbwire fence was damaged and had to be rebuilt.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was towed off from flt glider port near Briggs Texas at around 1 pm. I released from tow plane at near 3,000 feet above ground found thermal lift and proceeded northwest towards Goldwaithe Texas. Near Goldwaithe, turned south flew towards San Saba Tx. I then turned Southeast towards Burnet Texas, after reaching the highest point of the flight continued on southeast but did not find any substaing lift. I found a field that looked landable circled and landed without putting my landing gear down. Therefore I was not able to slow the glider down enough, and the glider was stopped by a barbwire fence at approximately 4 pm. I substained a broken nose from the barbwire that broke the canopy. The flight was recorded on a colibri gps and uploaded to online contest site for September 1 flights under name of Morris Carter.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The main thing to be done is to go through your pre landing checklist and lower your landing gear so one can have some braking action before hitting an obstacle.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
