Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wing and strut damage. Float and float strut damage. Some fuselage damage. No other property damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight originated at KRME approximately 12:45 Eastern time with the intention of some practice water landings and takeoffs, fueling at Payne's Air Service, and then switching pilots for some more practice. Flight following was obtained but dropped by Syracuse prior to reaching Fourth Lake due to lack of radar services. First landing and takeoff were on Fourth Lake in the Adirondacks and then to Raquette Lake. Landing was set up based on wind indications on water as well as observing another seaplane weathervane apparently waiting to take off. The landing was uneventful, but while slowing off the step a gust of wind apparently lifted the right wing to the point where the left float dug into the water and the plane rotated forward onto its back. Both pilots exited the plane. The other float plane approached, but was unable to get too close due to the wind. Two pontoon boats approached and one picked us up. Mark Bird from Birds Marina came out with his boat, we transferred to his boat, and he slowly towed the aircraft to his marina.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Talk to more experienced seaplane pilots, describe the situation and ask their thoughts on how it might have been handled differently.
