Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft was overturned and submerged in salt water. The wings were damaged during the recovery process. (The extent of damage sustained to the aircraft prior to recovery operations is unknown)

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight departed Juneau, AK at 1030 local time enroute to Cordova, with a planned stop in Yakutat, AK. I obtained an in-person weather briefing at JNU FSS prior to departure, looked at the weather cameras and utilized internet weather apps, including "windy.com" which includes tidal and wave information. The weather was clear with light winds along the route. Prior to this flight, I contacted the Yakutat Harbor Master to obtain local information and orientation of the seaplane base, hazards, and potential issues, and reviewed the marine charts online. I filed and activated a VFR flight plan JNU-CKV. The flight was normal, and I landed in a calm winds on flat water at the entrance to the small boat harbor area, taxied in, and secured the plane to the seaplane dock. We added approximately 8 gallons of fuel from bladders, had lunch, and updated the flight plan. I sumped the fuel, performed a pre-flight inspection and pumped out both floats. We departed the dock, passing an inbound boat as we slow-taxied out of the harbor to check conditions and traffic in the larger bay. We idle-taxied back to the mid-east side of the harbor, and I initiated the take off run into the wind, utilizing the left turn tendency of the plane to align with a slight NW wind shift outside the harbor. While established on the step but prior to obtaining flying speed, the aircraft had an abrupt, uncommanded swerve to the left, (with associated forces acting on the outside of the turn). I observed a ripple line or small wake come directly toward the left float broadside and the float came out of the water briefly before settling back on the water as the ripple line moved under the float. It was a distinct ripple, not a V shape. The right float submerged on its side (not the bow), the right wing tip contacted the water. The plane pivoted 90 degrees clockwise around the right wingtip, then overturned to the left, submerging partially on its left side. We exited out the passenger door, which was mostly above the water line. I retrieved a dry bag with survival gear from its stowage location. As we exited the airplane, we could see a boat coming our way from the small boat harbor, and we were picked up within minutes. There were no injuries. We were met by responders at the dock. The plane ultimately rolled inverted and was towed to the seaplane dock and secured at the dock.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Its unknown why the plane abruptly swerved to the left, which destabilized the plane, but one scenario has been suggested, by the FAA, several locals, and pilots familiar with the area. It was suggested I encountered a whale. While I did not feel any impact or "bump", it could be possible that the movement of such an animal under the plane could cause an abrupt change in the water flow dynamics and forces acting on the floats and set up the distinct ripple that approached and moved under my float. There were no other boats on that side of the plane to create a wake. I don't know how to prepare for that, other than to remain alert in areas known to be frequented by whales, such as the bay and harbor around Yakutat.

Aeronautical charts incorrectly depict the Yakutat seaplane base location. It is co-located with the small boat harbor visible on google.earth, attached to the mainland side. Pilot and aircraft times are estimates. My electronic log book was destroyed in salt water immersion, and the aircraft logbooks are with our insurance company.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
