Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Wrinkled fairing and bent left landing gear door

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After going missed at Mount Pleasant, I talked to Chicago center and asked for and was given direct RITTOY on the GPS 8 into Keokuk, where the AWOS was reporting 300 ft and 1 mile. I got to RITTOY, did the procedure turn/hold and was cleared for the approach and released to CTAF frequency. I turned on the lights, configured the airplane and descended per the approach. As I hit about 50 ft above minimums, I saw a light which I perceived to be the runway lights, I descended and contacted the ground between a half mile and a mile west of the airport, as soon as the aircraft hit, I added full power and climbed a couple hundred feet back into the air when I saw the actual runway lights, I made a safe and successful landing.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I mistook a building light for the runway. In the future, I can only descend 100 ft past minimums if I think I have the runway environment in sight.
