Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft left wing leading edge and wing tip damage, prop strike (propeller/engine damage), motor mount is bent and firewall damage also. The Cowl and boot cowl are damaged.

No Property Damage

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While on final approach to land on runway 22 at Herron Airport (7G1) a car driven by Mr. Campbell pulled up to the stop sign and stopped. I watched the car from the aircraft, and it just sat there. I saw what I thought was the driver turn his head and look, at this point I thought that he did see me, as the car continued to sit there at the stop sign. The very second that I touched down (about 40 ft. from the crossing) at approximately 65-70 mph. Mr. Campbell pulled out onto the runway in the path of the aircraft, very slowly, to proceed across the runway. I was able to avoid the vehicle by veering off of the runway into the grass. Mr. Campbell said that he looked but did not see me because of a blind spot in this car.

*Note: In my car, I was able to verify this as the pillar behind the door blocked the location on the runway where I was located. It was necessary to "lean forward" to see the entire runway.

Feeling like a partial view of the runway was sufficient Mr. Campbell proceeded across the runway. This left me with very limited options and no time to consider the options (40ft @ 70mph). I was able to avoid Mr. Campbell and his passengers by locking up the brakes and veering off of the runway to the left. The aircraft's right wing went over Mr. Campbell's car as his car was crossing the runway and we both thought that we made contact, but we did not, we could not find a scratch on the car. The aircraft's propeller dug into the ground as well as the left wing tip causing extensive damage to the aircraft.

There is a huge sign at the crossing (by the STOP sign) that warns the driver to STOP and LOOK "You are crossing an active runway"

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Landing short would have eliminated the issue. But any driver crossing this runway should be 100% certain that the runway is clear, there is a HUGE sign at the intersection warning car traffic that you are about to cross and active runway, please look in both directions for aircraft traffic. This driver simply did not lean forward so he would have a view of the entire runway.

The airport is looking into several options to prevent this in the future, a couple ideas discussed were radio activated flashing lights, talking to the county to try to re-route the road, additional cameras will soon be added, local police so sit there frequently and watch the crossing. It is not a busy crossing, but still a concern. we are continuing to discuss ideas, the airport is a private airport.
