Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft impacted a homeowner's weather station mounted on 3" PVC pipe with left wing approximately three and a half feet from the wingtip. Aircraft suffered a fabric tear from leading edge to trailing edge, some rib damage, and a dented left aileron.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Student Pilot on initial solo made 4 patterns and 3 full stop landings on the grass to Runway 25 at Grove Field. Winds were light and variable but shifting to favoring Runway 07 on the last pattern. During the last part of the landing roll, the aircraft started to head left and the student corrected to the right. The aircraft went to the right but the student was unable to correct back to the left, typical of the early onset of a ground loop. The aircraft was moving slowly enough that the right wingtip did not touch the ground but the left wing did impact a homeowner's weather station mounted on a 3" PVC pole tearing the fabric in the bottom of the wing from leading edge to trailing edge. The weather station was destroyed.
