NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Matt's approach to landing was looking good from what I saw if anything he was possibly just coming in a little faster than normal but had plenty of runway to down. Matt transition/flared nicely he was wings level in ground effect but as was wings level in ground effect slowing down I noticed the right wing kind of pop up on him this was just before he touched down on the runway which to me makes me think it must of scared him at that point because I did also notice he did land just slightly sideways he must of over corrected on the controls or didn't correct correctly on the controls and lost control of the airplane and was unsure of what to do in the moment. After the fact talking with ^{John} ~~Robert~~ he mentioned he was unsure of what happened and that he had just lost control but that he was trying to get the airplane onto the grass runway of 18-36 but from where he was in the airplane he did not notice the ditch off the side of the runway which nose planted him into the ground as well as hitting the mandatory runway sign.
