Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller, both wings, tail, fuselage damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

About 16:00 local approach to landing was made with full flaps at about 65 mph to runway 33. Upon touchdown aircraft bounced and veered right. I immediately applied full power and quickly approached trees right of runway. I attempted to clear area between two trees but struck one with right wing. The right wing impact forced aircraft into immediate turn where stuck smaller tree with left wing. Aircraft came to rest just east of airport in field.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The airplane did not climb above the trees because I inadvertently failed to reposition the flaps on go around. This resulted from the panic I experienced when I discovered how close I was to impacting the trees. I should have more slowly advanced the throttle providing more time to retract the flaps and properly evaluate my alternatives.
