NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On 10/08/2018, I was conducting hot air balloon flights in the Albuquerque, NM area. This was the second flight for the morning. I had landed just South of Paradise Boulevard and Unser where myself and my crew switched out passengers and fuel tanks for the second flight. (Hop) During the loading of the passengers, passenger Kay Raag to my crew chief, James Kosinski, not to hold her too tight because her arms and legs hurt. Kosinski was able to assist her into the balloon basket where she made the statement that she was 78 years old. The rest of the passengers were loaded and the new fuel tanks were added.

During my safety briefing, prior to lift off, I told all of the passengers that there was no landing gear on a balloon and we were at the mercy of the winds. I explained the process for landing and stated that I would tell the passengers, "Prepared to land!" and the passengers were to face me in the basket, grab a rope in the basket on both sides and bend their knees. Because of the statement made by Raag of her age, I told Kay Raag that during landing she would face the side of the basket and grab the ropes in front of her. This would put her back against the padded wicker side of the basket instead of placing her shoulder against the basket. I had Raag turn the way I instructed her so I could make sure she understood. She complied. We then launched at 0901 hours and the balloon headed north. I have the GPS track and will supply it to investigators if requested. The flight lasted 57 minutes and 56 seconds. We took off at an altitude of 5268ft and went up to an altitude of 6947ft. Top speed during the flight was 13.3mph and the average speed of the flight was 5.25mph.

After approximately 50 minutes, I gave the landing instructions to the passengers again. I explained that I was going to land in the center of a dirt road. My landing speed was approximately 6mph. I gave the command to prepare to land and the basket touched down in the center of Inca Road Northeast, just South of Aeuste Road Northeast in Rio Rancho, NM. The basket made very light impact to the ground and then swung to the North, maybe 10 feet, and stopped. I left the rapid deflation port open so the balloon could deflate. As it deflated, the basket laid over on its side. It was a very easy landing and the reactions of the passengers indicated that everyone was having a good time. There was nothing about this landing that would suggest an injury to anyone.

While assisting the passengers out of the basket, Kay Raag stated that she thought she broke her arm. She didn't appear to be in any pain until I tried to help her up. She was holding arm and again stated that she thought her arm was broken. I helped out of the basket and then helped her into our transport van and had her transported to Rush Medical Center for treatment. I gave Raag my cell phone number and told her I would pick her up from the hospital when she was released because she had a flight to catch to get back home to Indiana.

About two and half hours later I received that call and picked her up at the hospital. She stated that the doctors told her she had a fractured upper humerus and her arm was in a sling. It was not in a cast. During our drive to her hotel, Raag stated that she was receiving infusions to strengthen her bones. She said she had suffered broken legs due to a brittle bone condition. Raag stated that she asked for pain killers but was informed by the doctor that there was one and a half hour wait to get narcotics due to the drug abuse problem. Raag stated that she had received a shot and had "some pills" in her purse to help her get home. I have a video of this conversation also. Raag stated that she believed that she followed my landing instructions but believed a man next to her had fallen on her during the landing but wasn't sure. She said that she understood that she knew the possibilities when she signed the release and understood the possibilities of flying in a hot air balloon.

I contacted Kay Raag on October 11, 2018. She stated again that she had fractured her upper humerus but no medical procedure had been done and she was still not in a cast. She stated that she was going to do doing physical therapy but no surgery had been scheduled.

It should be noted that Kay Raag never offered the information about her bone deficiencies, brittle bones or her history of broken bones (legs) prior to the flight. Had she revealed this information she would have been refused flight. Our reservation staff goes into great detail about medical conditions that would preclude someone from flying in a hot air balloon. Kay Raag stated that she was in good physical condition as was able to fly.
