☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

propeller strike and sudden engine stoppage. belly skin damage. runway skid marks.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was simulating engine out procedures. As I came in to land the plane. I noticed at the last second that the landing gear was not down. I then gave the plane full power and tried to go around. However, the plane pitched down and made contact with the runway. I was able to use the rudder to maintain control of the plane. I came to a stop about 1000 feet down the runway and was safely able to exit the plane. There were no injuries from this incident.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Second guessing is always difficult. I can only think that if I had been more observant of the light that shows the landing gear is down, it could have saved the day. The light in this particular aircraft is a bit difficult to notice as it is very small. Also, the gear handle is a toggle switch that is very small. Function-ability of this aircraft could definitely have been improved by the manufacturer of the Comanche.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
