Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear collapsed after hitting cut corn so the front wheel bent the cockpit floor. Propeller hit the ground breaking off. The canopy cracked and broke. Lower engine cowling broken. Property damage was skid marks on the dirt from the nose section.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Monday, October 22, 2018 I took off from Junction City Freeman Field 3JC my home base for a short flight. I was airborne for about 5 minutes when I felt air coming under the canopy. I looked at the canopy latch and found that it was popped up a little bit. When I went to try and secure it the canopy came open. I tried to secure it but I couldn't get it far enough down because of the wind pressure pulling up on the canopy. With the canopy raised up the aircraft became very difficult to control. The wind in the cockpit blew my jacket that was sitting on the passenger seat into my face which I quickly removed and then decided to make an emergency landing.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

A canopy sensor or switch that would detect weather the canopy is locked down or not. The switch could deactivate a light on the panel showing the canopy is locked down and not open.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
