Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was doing touch and goes and runway 18/36. the tower reported wind at 210 @5. On my touch down the aircraft launched upwards and began to porpise. it went up once and i decided it was unsafe and added full power to go around. The aircraft appeared to fly normal so i went around again on the seconds laning i bounced a little but did not porpise. I still was shook up about the first landing so i decided to goto full stop and park the plane.
