Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damaged left wingtip, left flap, left aileron, due to abrasion from the runway surface. Left inner gear door damages by main gear, left gear linkage bent and left propeller bent due to contact with runway

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed from KTMB to KGNV on an instrument flight plan in VMC conditions. I arrived in Gainesville at approximately 6:00pm local. I made a normal visual approach to runway 7. As I recall, winds were light and from the southeast. I noted a green gear down light and that the nose gear indicator was also down. After landing on RW7 and during roll out I inadvertently moved the landing gear retract lever to the "up" position. I immediately recognized my error and moved the lever back to the "down" position. The left wing appeared to settle slightly so I added power and went around. I asked the tower to view the gear prior to landing; they confirmed that the left main gear was canted inward and did not appear to be in the locked position. I reviewed safety procedures with my passengers and made a second approach to land on RW7. The gear down light indicated "green"; the nose gear indicator also indicated down and locked. I landed with full flaps and at the slowest possible speed. As the ground speed slowed, the left wing settled onto the runway resulting in the damage listed above. My passengers exited the airplane in an orderly manner via the main cabin door. I secured the aircraft electrical and fuel systems before exiting the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Exit the runway and stop prior to performing post landing checks
