

NATIONAL TRANSPORTATION SAFETY BOARD
PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT
This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location Nearest City/Place: <u>Cleburne</u> State: <u>Texas</u> ZIP: <u>76028</u> Country: <u>US</u> Latitude: <u>32.34N</u> Longitude: <u>97.43W</u> <i>(Enter in decimal degrees or degrees:minutes:seconds)</i>	Accident/Incident Date/Time Date: <u>11/01/18</u> Local Time: <u>2:00</u> <i>mm/dd/yyyy</i> Time Zone: <u>Central</u> Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None
--	---

AIRCRAFT INFORMATION

Registration Number: <u>N39843</u> Manufacturer: <u>Cessna</u> Model: <u>172</u> Serial Number: _____ Year of Manufacture: <u>1966</u> Amateur-Built: ☐ Yes ☒ No <i>If Yes:</i> ☐ Kit/Plans ☐ Original Design Make: _____	☐ IFR-Equipped and Certified ☐ Commercial Space Flight ☐ Unmanned Aircraft Maximum Gross Weight: _____ lbs Weight at Time of Accident/Incident: <u>2,500</u> lbs Number of Seats: <u>4</u> Flight Crew Seats: <u>2</u> Cabin Crew Seats: _____ Passenger Seats: <u>2</u> Number of Engines: <u>1</u>
---	--

DAMAGE TO AIRCRAFT AND OTHER PROPERTY		
Aircraft Damage ☐ None ☐ Substantial ☒ Minor ☐ Destroyed ☐ Unknown	Aircraft Fire ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Fire at Unknown Time ☐ On-Ground ☐ Unknown	Aircraft Explosion ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Explosion at Unknown Time ☐ On-Ground ☐ Unknown
Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Dents and dings only, minor scratches. Biggest dent in left wing unknown if it damaged the spar yet. Tail had a few dents as well as the right wing. Scratches to paint from rubbing trees and shrubs.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible. I was flying a Cross Country to get some hours in my log book, I had the route planned and all of my weather and information ready to go. I am a brand new pilot and I was so eager to get out and fly and enjoy the day because it was beautiful out I thought I had the correct fuel burn so when I would return to KCPT I would have 10 gallons left. I didn't consider touch and goes from the airports also I encounter some headwinds also I was constantly looking at my fuel gauge which I know now is not the right thing to do because they tend to read wrong. Fuel was burning from the left and slowly from the right on the way back from KMWL my right tank was reading 1/4 and my left at 3/4 full so I thought I was correct on my fuel burn not bothering to look into the tank itself and see with my own eyes if there was fuel or not. The whole way back I was looking and everything looked fine I had the fuel put on the right tank to burn some there not knowing that my gauge was not reading correctly I wasn't thinking about it. I had KCPT in sight I was ready to end the day right I had a great day of flying making all my landings and seeing new airports. I got to left downwind and I got my speeds just right I apply 10 degrees flaps and I put the fuel on both, I report base just fine then I turn final. Once I turned final boom the engine goes out, I'm staring at the prop just sitting there I couldn't believe it I could see the runway I was lined up perfectly. The problem with runway 33 is that there is houses right before it so after I tried starting the engine again and knew it was not going to start I had two choices. One try to make the runway I was maybe 2 miles out and I was falling quickly. So rather than risking the runway thinking of the possible outcomes I could have crashed into a house, hit a power line, or stall in the air pulling up trying to avoid things so I crossed that idea out the only choice to me was to get the plane down and not risk anything so that's what I did. I saw my opening I threw in flaps and I descended into a field I really thought I could stop in time before the few trees in the entire land but once I touched down the ground was so soft still I just slid for a while. So I ended up in a few trees my heart was beating out of my chest but I was safe and I didn't risk injuring anyone or damaging anyone's property. I got out and looked at the damage and the plane was dinged up here and there but everything was fixable still and I walked away.		

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation I know now not every to rely on fuel gauges in older planes. I didnt count for my touch and goes at the airports I stopped at. I should have fueled up with my own money along the route which is exactly what I plan on doing from here on out. I dont think I will every have to worry about running out of fuel again because I never want to go through that again. I learned the hard way but I my eyes I did the right think because I didnt risk trying to make it and damage or kill someone there was no way I was willing to take that chance. I am going to be much more percise on my fuel burn and be much more aware and look in the tanks myself. I got too excited to just get out and fly on my own and see new things that I forgot one of the most important things about the plane, the fuel and also never trust fuel gauges.															
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)															
Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i> Fuel gauge was still reading 3/4 full on right tank			Total Time/Cycles On Part _____ Hours _____ Cycles												
			Time Since This Part Inspected/Overhauled _____ Hours												
FUEL & SERVICES INFORMATION
