Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

wing broken, windshield, fuel very damaged?
 Insurance company "totaled" the plane

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Reported SCAH where N738VK has been hangared many years, wind nearby calm. Taxied to 22 at Delta, departed 22, right turn at K-10 Fulton County Johnstown NY, got Fulton Co. AWOS, announced on VHF and did a check and go on runway 28. Wind max 5 Kts I think, skies clear, visibility 12 plus (looked unlimited). Flew to Paved K-9, right base past "the island", announced on K-9, common frequency (unmonitored). On final runway 4, observed the runway had been plowed, with low piles on runway sides. Looked like a dusting of snow on the runway so I began the braking would be poor, with a long run. When I touched down, plane slipped sideways, I think on some snow or slush, then caught a wheel on the 8-10 inch plow pile on the edge. I tried to go around (cram, climb) but already angled slightly to the left of the runway. I didn't get airborne soon enough or with sufficient airspeed to either adjust my course to runway heading or to clear the grove of trees. I last remember seeing the trees 2-300 feet out, pulling back on the controls with the thought of slowing, even stalling and hitting belly first to soften the impact. I do not remember the actual impact. I may have been dazed in the plane for a few moments, but almost immediately saw the door was broken open and ground close. Plane was nose down off the trees. The pilot seat had broken forward from the floor. I was able to climb out, walk to the EMS ambulance, to Nathan Latourre Hospital ER, checked thoroughly with only a few skinned and scrapes, some that day.

There was no N738VK malfunction. Had full power with 50% & 100% takeoffs, & with attempted go around at K-9. Fuel wing tanks empty and empty. Full N738VK completely redone at Air Plains in Wichita around 2000 with new 180 hp engine, totally rebuilt about 900 hours since. Until now, no major repairs, no accidents, always hangared. Plane was in excellent shape

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Don't land on an airport that's unattended, with no uniform response, unless I've actually observed conditions from the ground first, in the window, especially from the air and on final, it appeared OK - but there was some snow (drifted a bit) or slash not seen from the air.
